The Difference Between an Aggregate Plan and an Embedded Plan

Aggregate: For any policy with two or more members, the deductible and/or out-of-pocket maximum (OOPM) must be met by any one or any combination of members before the plan will make payments.

Embedded: Each member will pay towards, but never exceed, their individual deductible and/or OOPM until the larger Family deductible and/or OOPM is met. Once the Family deductible and/or OOPM has been met, the plan will begin payment of services for all members on the contract, regardless of the status of any remaining individual deductible and/or OOPM levels.

NoDD: Not subject to deductible.

[†]Silver 4 Health Reimbursement Arrangement (HRA) comes with an Embedded HRA plan and requires an employer contribution of \$85.

^{††}This plan features an Aggregate deductible and an Embedded out-of-pocket maximum. *Member amount after deductible is met.
